

----- REPORT FOR RTT fo Ip 192.168.1.2-----

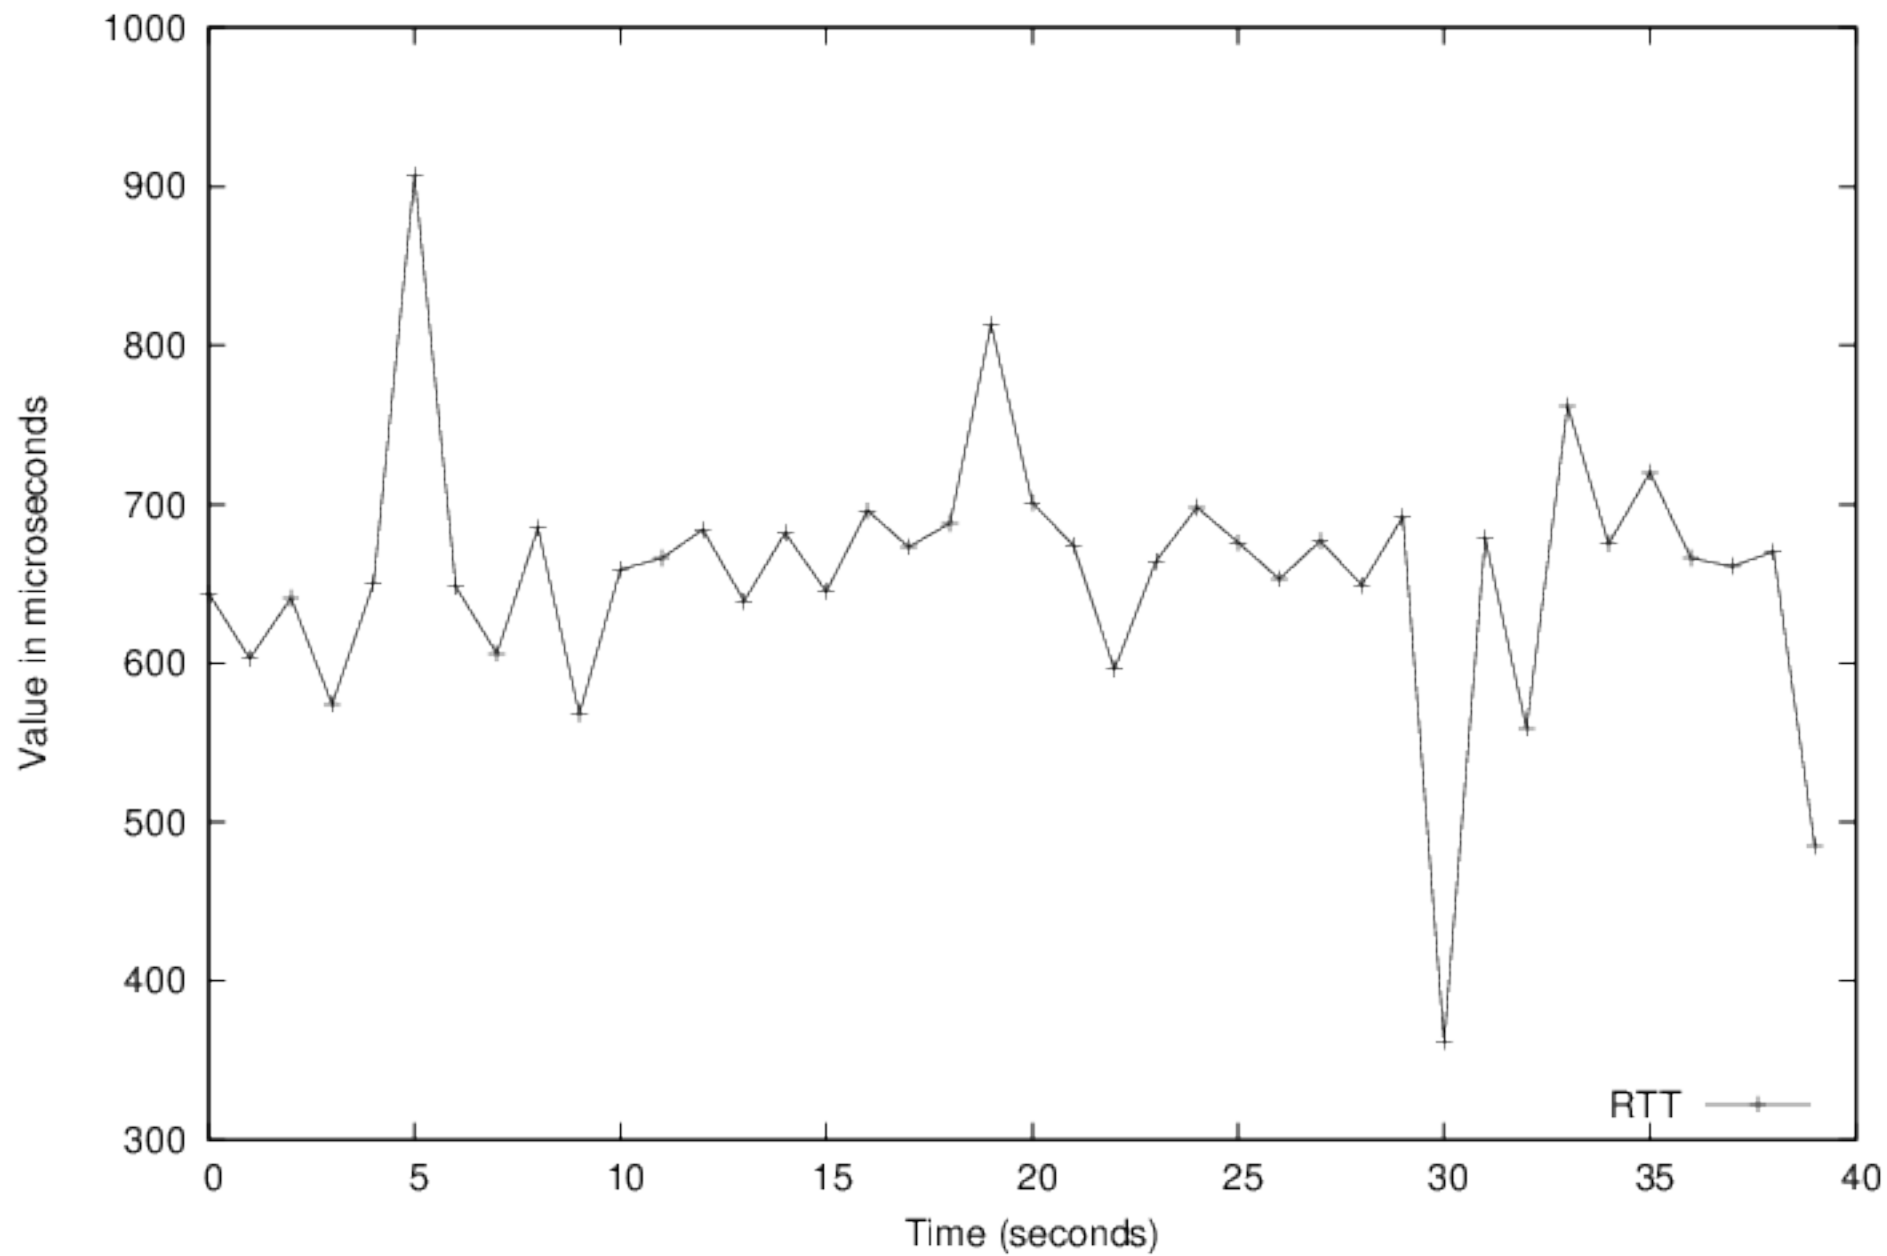

---The minimum RTT observed during two diferent tests was-----
----- 145 usec and 199 usec -----

---The mean RTT observed during two diferent tests was-----
----- 530 usec and 674 usec -----

---The max RTT observed during two diferent tests was-----
----- 726 usec and 1390 usec -----

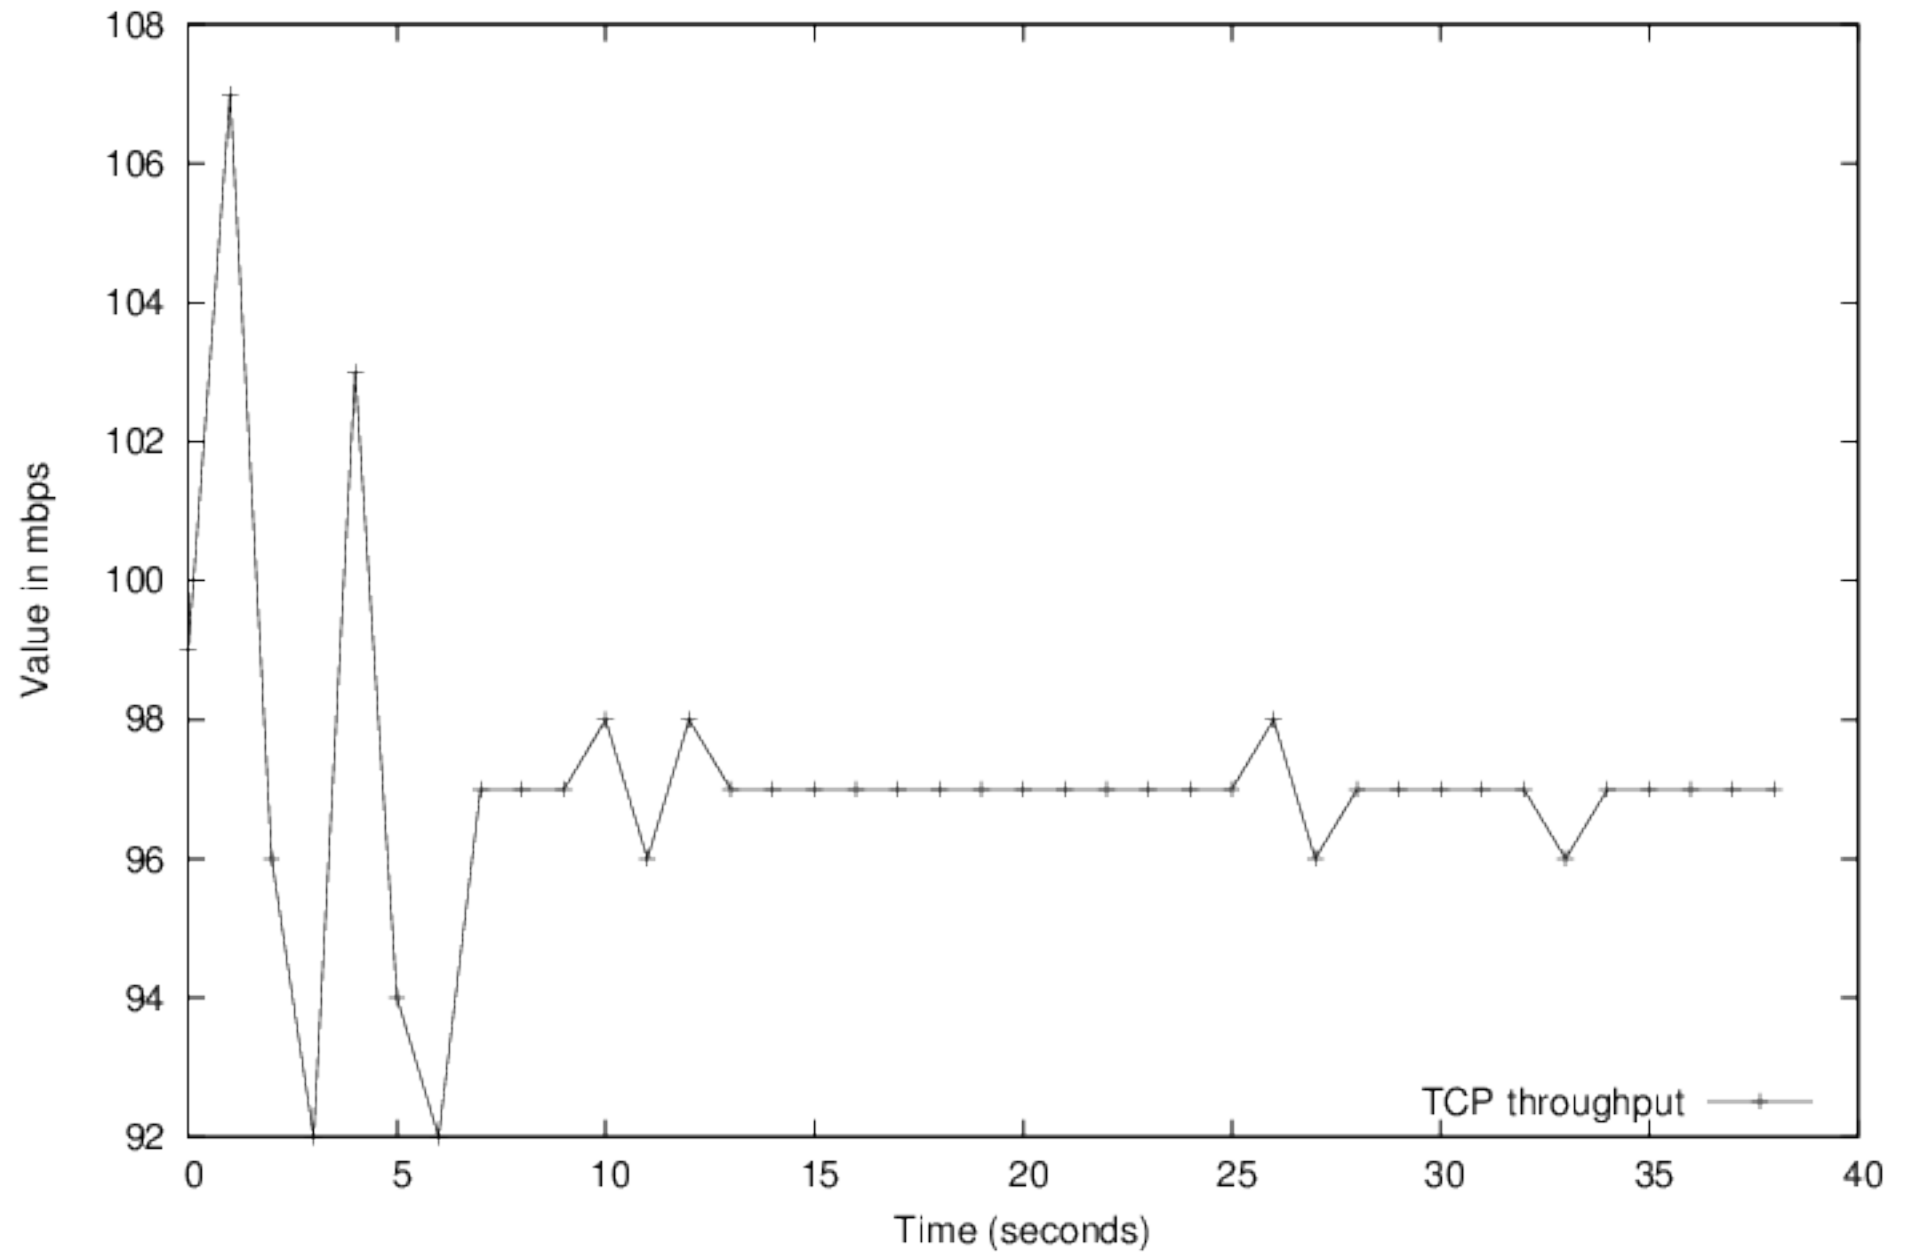

---Below is the evolution in, time of RTT-----

RTT evolution in microsec for ip: 192.168.1.2

```
----- REPORT FOR TCP throughput of Ip 192.168.1.2-----  
-----  
-----  
-The minimum TCP throughput observed during two diferent tests was-  
----- 81 usec and 96 usec -----  
-----  
--The mean TCP throughput observed during two diferent tests was---  
----- 95 usec and 96 usec -----  
-----  
---The max TCP throughput observed during two diferent tests was---  
----- 98 usec and 99 usec -----  
-----  
----Below is the evolotion ,in time of TCP throughput -----  
-----
```

TCP Throughput evolution in mbps for ip: 192.168.1.2

```
----- REPORT FOR UDP throughput of Ip 192.168.1.2-----  
-----  
-----  
-The minimum UDP throughput observed during two diferent tests was-  
----- 97 usec and 97 usec -----  
-----  
--The mean UDP throughput observed during two diferent tests was---  
----- 98 usec and 98 usec -----  
-----  
---The max UDP throughput observed during two diferent tests was---  
----- 99 usec and 99 usec -----  
-----  
----Below is the evolotion ,in time of UDP throughput -----  
-----
```

UDP Throughput evolution in mbps for ip: 192.168.1.2
